

RIS Policy and Regulatory Framework of the CCNR

RIS WEEK, Prague 15.06.2016

Raphaël WISSELMANN, Secr. CCNR

01

RIS Policy and Regulatory Framework

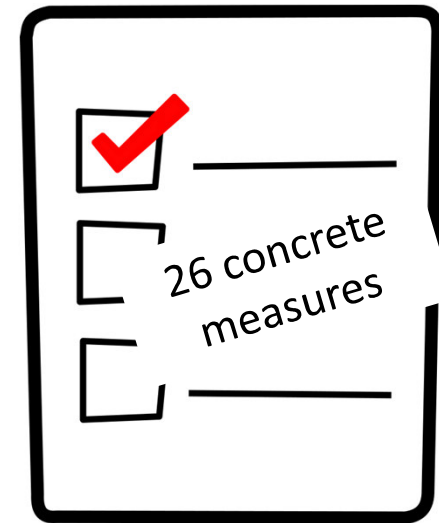

In 2012 CCNR adopted its RIS strategy with intention of harmonized implementation of RIS along entire length of the Rhine.

A corridor approach ... but each corridor has its own needs!

Main goals of CCNR RIS strategy

- ⇒ Prevention of risks in order to increase the safety of navigation of the Rhine
- ⇒ Promote economic development of inland navigation

RIS do not live in isolation:

- ⇒ Publication of RIS Standards ... And their incorporation in regulations or connexion with other IT Tools
- ⇒ RIS are constantly evolving: smooth procedure for updating standards and regulations

02

Outlook

Amend and evaluate Police Regulations regarding RIS applications

- Extension of electronic reporting for tank vessels
- Evaluation of installation and use of inland AIS equipment and visualisation system

Using ES-TRIN (European Standard Technical Requirement Inland Navigation) to ensure safe RIS equipment as well as safe installation on board of vessels

Pursue innovation in the framework of CESNI

- Development of technical requirements on automatic channel guidance systems
- Safety standards concerning ICT equipment (information and communication technologies) on board of inland waterway vessels

THANK YOU FOR YOUR ATTENTION !
